Summary

- Application Developer at Oracle specializing in Fusion Financials and Agentic AI engineering. Proven track record of architecting intelligent AI agents, workflows, and agentic applications using Fusion AI Studio and Codex, combined with strong enterprise database expertise in Oracle PL/SQL and SQL. Experienced in managing production environments, handling high-severity incidents (Sev1s, OWCs), and engineering data pipelines for enterprise financial platforms.

Skills

- Fusion Agentic Application | Agent Workflow Designing | PL/SQL | SQL | Token-Efficient Prompt Engineering | Agile

Experience

Application Developer	Oracle	04/2024 - Present
• Co-architect and deploy enterprise-grade Agentic Applications and AI agents (including the Fixed Asset Inquiry Agent) using Fusion AI Studio and Fusion AI frameworks to automate real-time data retrieval across asset and book codes. • Lead technical resolution for high-priority incidents, handling Sev1 outages, and complex customer escalations to ensure high availability of published agents. • Leverage Codex and prompt engineering to streamline developer workflows, generate key quarterly reporting data, and optimize backend AI agent execution. • Maintain, monitor, and fine-tune production AI agents and agentic workflows to support Fixed Assets product clients.		
Senior Software Engineer	Coforge	04/2022 – 03/2024
• Key developer for Asset Data Services (Central Asset Repository for Wealth Management platform), engineering PL/SQL packages, procedures, triggers, and pipelines to clean, massage, and deliver goldenized data to downstream consumers like Kafka, OMS, Quartz, and EDB silos. • Participated across all phases of SDLC within an Agile framework, contributing to sprint planning, daily scrums, QA collaboration, go-live deployments, and post-production monitoring.		
Software Developer		01/2020 - 03/2022
• Designed and modified PL/SQL database objects (procedures, functions, collections, triggers) packaged for financial applications. • Partnered with QA teams to debug complex database packages, execute database queries, and validate ETL data integrity.		

Projects

Fixed Assets	01/2026 – Present
• Tech Stack – Fusion Agentic Application Agent Workflow Designing Fusion Claw Fusion AI Studio APL/SQL SQL • Engineered agentic solutions supporting Oracle customers in managing assets using Fusion AI Studio, Fusion Claw, and PL/SQL integration.	
Asset Data Services	05/2023 - Present
• Tech Stack – PL/SQL Oracle SQL ETL My SQL Putty Kafka • Developed data-scrubbing and repository workflows using PL/SQL, Oracle SQL, ETL, Putty, and Kafka for wealth platforms.	

Awards

Award of Excellence	Coforge	Aug 2022
Pat on the back	Coforge	Apr 2022

Education

Bachelor of Technology (IT)	SKIT, Jaipur (RTU)	07/2015 - 06/2019
